Social Security

How would you protect Social Security for today's seniors and strengthen it for future generations?

AARP's Position:

Social Security should continue to guarantee that Americans who work and pay into the system receive benefits based on what they earn and contribute. Benefits should keep up with inflation and last for as long as an individual lives. We must strengthen Social Security for the future and protect benefits for people who count on them most, including surviving spouses and families, lower-wage workers, and disabled individuals who no longer can work. Social Security must be put on stable financial ground, but any adjustments should be implemented gradually so changes do not impact those in or near retirement.

Bill Posey (Rep):

The President is essentially saying he could take incoming Social Security payroll taxes and spend them elsewhere," said Congressman Posey. "That money belongs to the nation's retired seniors who have spent their entire lives working and paying into the system. The Federal government is obligated to make these payments and anything short of doing so should be considered theft. (Source: Rep. Posey's Congressional Website, <http://ow.ly/xxhX4>)

Medicare

How would you put Medicare on stronger financial ground and protect today's seniors and future retirees from rising health costs?

AARP's Position:

Medicare should be strengthened and improved so both current and future generations can count on having access to high-quality, affordable coverage. Medicare should continue to guarantee a specific set of benefits that are affordable and meet a person's health care needs. Medicare should offer choices that ensure access to high-quality health care. Medicare should improve the quality, safety, and efficiency of care by emphasizing value and cracking down on fraud, waste, and abuse.

Bill Posey (Rep):

My commitment to seniors has been, and remains, that there shall be no changes to Medicare for those in or near retirement. Medicare provides a critical safety net and it should be there for this generation of retirees and the next. (Source: TC Palm, <http://ow.ly/xxhM8>)

Financial Security

How would you help Americans save so they can secure their future and live independently as they age?

AARP's Position:

More opportunities and incentives should be available for all Americans to plan and save so they can have a more secure future. Freedom from age discrimination is a fundamental right and critical to Americans' ability to have a secure retirement. Every worker should be treated fairly, regardless of age. We need to support family caregivers who make it possible for more seniors to live in their homes and communities, where they want, rather than taxpayers and struggling families paying for costlier care.

Bill Posey (Rep):

"[...]We've seen over the past year that more government spending under the guise of "stimulus" just is not the answer. With record deficits and crushing national debt, we can't expect Washington to spend more money we don't have to prop up an economy desperately in need of more jobs and better goods and services. Government can't make those things happen, but it can let small businesses and families keep more of their hard-earned money with lower taxes on investment and spending, giving them the freedom to spend more so small businesses can create jobs[...]" (Source: Congressman Bill Posey for Congress, <http://ow.ly/xxhM8>)
