## **Social Security**

*How would you protect Social Security for today's seniors and strengthen it for future generations?*

### **AARP's Position:**

Social Security should continue to guarantee that Americans who work and pay into the system receive benefits based on what they earn and contribute. Benefits should keep up with inflation and last for as long as an individual lives. We must strengthen Social Security for the future and protect benefits for people who count on them most, including surviving spouses and families, lower-wage workers, and disabled individuals who no longer can work. Social Security must be put on stable financial ground, but any adjustments should be implemented gradually so changes do not impact those in or near retirement.

### **Ronald P. Gruett (Dem):**

In addition to protecting the programs that benefit low- and middle-income Americans, such as Medicare, Medicaid and Social Security, Gruett said he also supports the Affordable Care Act. (Source: Waupaca County Post, <http://ow.ly/yKaAH>)

### **Reid J. Ribble (Rep):**

To protect our seniors as well as future generations, I believe the federal government must implement two simple but significant reforms. We must stop politicians from raiding the Social Security Trust Fund to pay for other programs. We must 'personalize' Social Security, so that the money you pay into Social Security, you receive that same money plus interest when you retire. That way that money is saved only for you. ## **Medicare**

*How would you put Medicare on stronger financial ground and protect today's seniors and future retirees from rising health costs?*

### **AARP's Position:**

Medicare should be strengthened and improved so both current and future generations can count on having access to high-quality, affordable coverage. Medicare should continue to guarantee a specific set of benefits that are affordable and meet a person's health care needs. Medicare should offer choices that ensure access to high-quality health care. Medicare should improve the quality, safety, and efficiency of care by emphasizing value and cracking down on fraud, waste, and abuse.

### **Reid J. Ribble (Rep):**

The Path to Prosperity is aptly named. It does exactly that, it creates a path forward from fiscal dysfunction to fiscal health. It will facilitate job creation with pro-growth tax reform, and it will institute a Medicare plan that not only protects current seniors but will protect my two grandchildren too. ## **Financial Security**

*How would you help Americans save so they can secure their future and live independently as they age?*

### **AARP's Position:**

More opportunities and incentives should be available for all Americans to plan and save so they can have a more secure future. Freedom from age discrimination is a fundamental right and critical to Americans' ability to have a secure retirement. Every worker should be treated fairly, regardless of age. We need to support family caregivers who make it possible for more seniors to live in their homes and communities, where they want, rather than taxpayers and struggling families paying for costlier care.

### **Ronald P. Gruett (Dem):**

AARP did extensive research but was unable to find any public statement on this issue by July 11, 2014.

### **Reid J. Ribble (Rep):**

To lessen the uncertainty in our economy, we need to give our nation's job creators a breather...I have introduced two regulatory moratorium bills to prevent the federal government from finalizing any new regulations for a given amount of time. My legislation would give employers and their employees additional certainty as we work to get our economy back on track...We must ensure the federal government is not picking winners and losers in the economy and work to eliminate loopholes in the code so we can lower tax rates for all Americans.
